**A Report
On
One Day Workshop
On
“Innovation &
Entrepreneurship
Development”**

on
26th August 2019

Venue: SICA seminar hall.

SIDDHANT INSTITUTE OF COMPUTER APPLICATION, SUDUMBARE

Date: 27th Aug 2019

Workshop on -

"Innovation & Entrepreneurship Development"

In association with **Rajesh Engineering Works**, Pune.

Objectives of Workshop:

- To inculcate a culture of innovation driven entrepreneurship
- To help your business grow
- To improve teamwork and collaboration
- To Help everyone understand the direction your business is heading in.
- To organize Business Plan Competitions / Innovation Camps / Hackathons with active involvement of industry and alumni.
- To motivate, support and mentor students for identification, development and commercialization of their innovative ideas.

Important factors of the workshop:

Turning invention into innovation relies on how an entrepreneur positions themselves, gets funding and manages their venture to become successful. Innovation is about the process and organization needed to generate ideas in any context."

While they revolve around the same idea, it is crucial to understand the difference. Innovation is applying your creativity to come up with a unique idea or solution. ... Progress depends on innovation and great innovators can get rich. Entrepreneurship, by contrast, is applying the innovation to bring the ideas to life.

Workshop Outcomes:

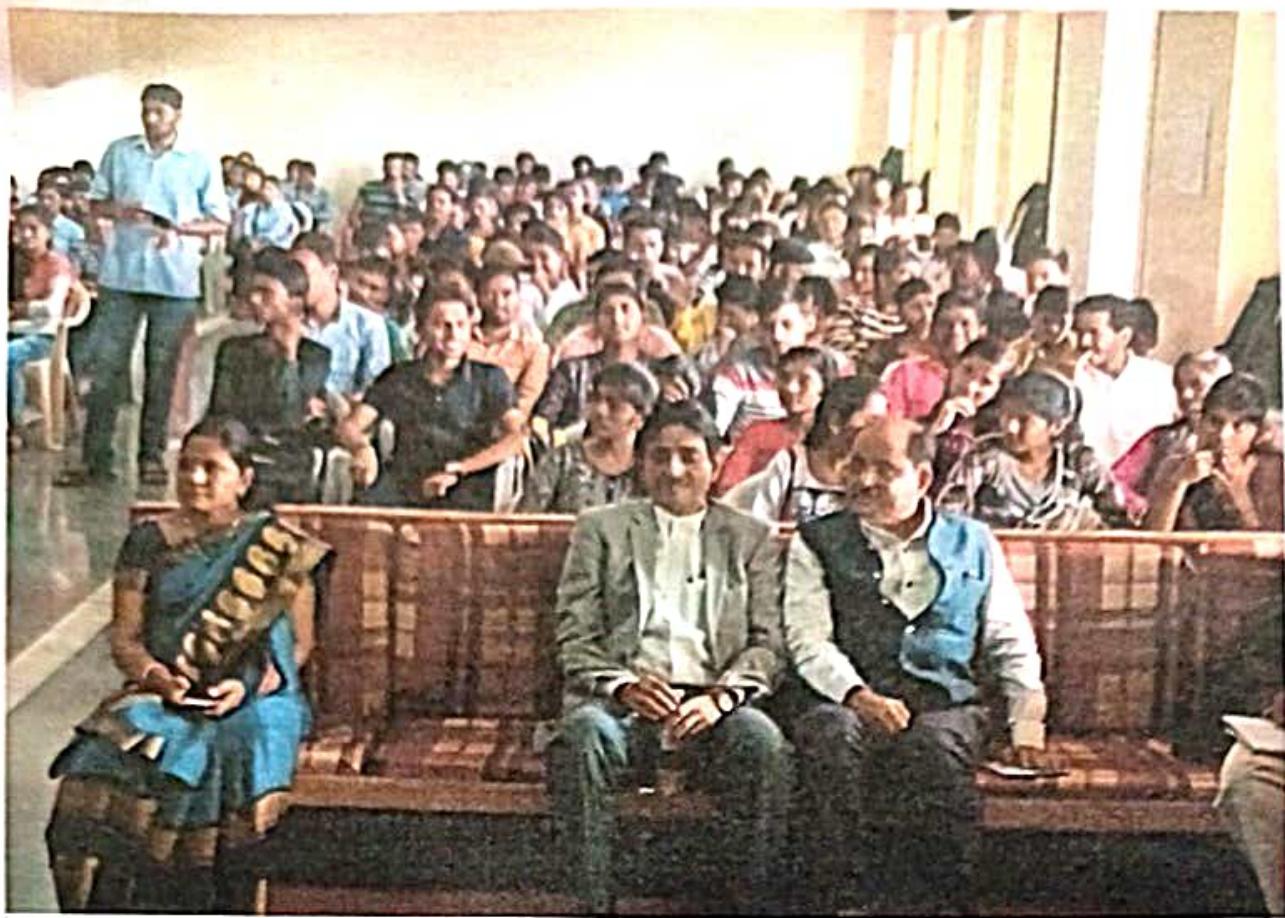

Entrepreneurship and Innovation minors will be able to sell themselves and their ideas. Students master oral and visual presentation skills and establish a foundation of confidence in the skills necessary to cause others to act.

Entrepreneurship and Innovation minors will be able to mobilize people and resources. Students identify and secure customers, stakeholders, and team members through networks, primary customer research, and competitive and industry analyses in order to prioritize and pursue an initial target market in real-world projects.
