7. DURATION OF MOU AND TERMINATION:

7.1 The terms of this MOU will begin when both parties have signed the document and will continue indefinitely, until terminated by either party by giving a written statement to that effect to the other party. Upon termination, both parties will ensure that the termination of this agreement is properly disseminated to the third parties, without cause, and refrain from any activity that would imply such association as continuing thenceforth. Upon termination of the MOU, both parties will identify any areas of mutual concern (including but not limited to Intellectual Property etc.) and work to find a common and mutually beneficial resolution.

8. INTELLECTUAL PROPERTY:

8.1 It is anticipated that during the course of the conduct of the MOU, researchers from the SICA will work closely with EXPELTEZE and other participating institutions on technologies of contemporary interest and value. The intent of EXPELTEZE is to disclose and publish the results of the work of the researchers in open literature such as arXiv and bioRxiv, which are industry standard forums for sharing the research output with the larger scientific community. Likewise, EXPELTEZE encourages the researchers to make available all supporting materials through public Github repositories. EXPELTEZE believes that, in addition to formally establishing ownership of their contributions, this mode of sharing established the credibility of the researchers in the community. The publications will include, in the title page of the published reports, the name(s) and the current affiliations of the researchers, as well as the attribution of support of the various organizations involved in the research activity. EXPELTEZE will also publish these articles in the EXPELTEZE website, again providing the credit and acknowledgement of support from the participating organizations for the research.

8.2 While the intent and focus of EXPELTEZE is to encourage open sharing of the discovery, there are certain situations when such open disclosure is not feasible. One such instance is when the researchers wish to hold off open sharing due to their wishing to conduct additional experiments or analysis prior to publication. EXPELTEZE will honor such requests and will support the researchers' decision in this regard. Another situation where such open disclosure will be deferred is when all parties (including all authors) believe that the invention has commercial value, and the invention is then transferred to a group in EXPELTEZE incubator for facilitating the startup activities based on the Intellectual Property, including filing of any patents or copyright protection. In all such cases, EXPELTEZE will be the sponsoring agency for the incubator team and will ensure that the Intellectual Property rights of all researchers and participating institutions are protected through the commercialization process. In these circumstances, the publication of the research results in open literature may be delayed by mutual concurrence, and efforts will be taken to publish the results in the open literature at the earliest feasible opportunity. In the case of any differences of opinion in any of the above steps, EXPELTEZE will mediate the process and seek to arrive at the best possible compromise.

We, the undersigned, have agreed on the contents this MOU. Any changes must be agreed to by both parties.
